THEM

Joe Spinell takes his bit part from TAXI DRIVER and, as writer and star, runs amok with it. It's a Summer of Spinell splatter spree as his disturbed serial killer terrorizes the Big Apple. Will fashion photographer Caroline Munro join his psychotic family of beautiful victims?

...and suddenly the screams of a baby born in Hell!

**TO THE DEVIL...
A DAUGHTER**

This Dennis Wheatley title was the last of the classic Hammer horror cycle. Occult author Richard Widmark and Satanic cult leader Christopher Lee battle for the nubile flesh and the immortal soul of young Nastassja Kinski. Denholm Elliott and Honor Blackman provide moral support as a horrible sock-puppet rises up from the depths of Hell!

BLACK SHEEP

**COLUMBUS
PREMIERE!!**

There are 40 million sheep in New Zealand and they're pissed off! Genetic engineering gone awry soon leads to violence of the lambs! It's a thoroughly enjoyable Cinemascope stampede of blood, guts, twisted kiwi humor and flesh-chomping effects courtesy of Weta Workshop.

ZOMBIE

...THE DEAD ARE AMONG US!

"When the earth spits out the dead, they will rise to suck the blood of the living!" Tisa Farrow embarks on a Caribbean quest for her missing father, only to find the island paradise up-to-here in ravenous, flesh-eating undead. Lucio Fulci's take on the living dead has a decidedly European flair with rotting corpses on the march. See the underwater battle of shark versus zombie!

aka **CANNIBAL FEROX**
Banned in 31 countries! Young anthropologists, hoping to confirm their preconceptions in the Amazon jungle, fall in with sadistic drug dealers enslaving a native tribe. When the worm turns Umberto Lenzi's exercise in extreme cinema is most definitely not for the squeamish.
